

To Whom It Concern:

I am writing this letter on the behalf of Maria Eugenia Perez, a student of mine at Columbia University. Ms. Perez has attended six of my courses in the Computer Applications & Technology (CTA) program. This program educates students to be prepared for analyzing and designing complex information systems solutions. Many of our graduates have gone on to become analysts, database designers, Directors of MIS and Chief Information Systems Officers. I am confident that Ms. Perez will tremendous contributions to the information systems industry.

Ms. Perez has completed a number of special projects for me which required her to demonstrate her ability to analyze and design real world development issues. Because of her experience with these assignments and the quality of her work, I am very confident that she will be able to contribute to any software engineering project. If you have any further questions, please do not hesitate to contact me at (212) 854-2820.

Sincerely,

Arthur M. Langer
Director, Information Systems Curriculum

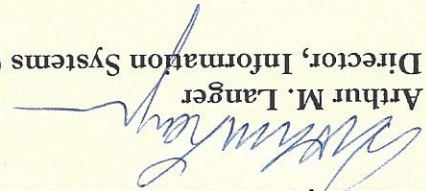

AML/dl
